Your**SECURITY**

Safeguard Security is proud to announce the release of our new **iControl security system**. Control your entire security system from a PC or a smartphone! You can even view camera's, control lighting, and get email alerts.

Homes without a home-security/alarm system have a significantly higher break-in rate, so invest in an alarm system to protect your home ... and use it. Most of us ignore the sirens of car and house alarms because they go off regularly, so make sure your house alarm is connected to the police and a central station to ensure someone will respond.
